

January 2007 - Kaleidoscope Windmill

Use bright fabrics for the blades. Use a high contrast fabric such as black for your background. Glue the templates onto cardstock or light cardboard. Cut them out along the outside lines. Trace the shapes onto your fabrics. Label each cut triangle.

Arrange the triangles according to the diagram. Sew each A to each C. Make 2 sets of CBCB triangles. Press seam allowances so that they all go around the windmill in the same direction. Sew the 2 sets together interlocking seams. Press.

Kaleidoscope 2

Key Block (7/20 actual size)
